Norris Hung

A hybrid developer / designer

passionate about simplifying and humanizing

2141 Golden Gate Ave San Francisco, CA 94118 United States www.norrishung.com norrishung@gmail.com (510) 965-8938

Code for America

Lead Interaction Designer & Front-end Developer
Apr 2015 - current

Led interaction design and front-end development on a CMS designed for government

Designed and developed a scalable pattern library and website template for government use

Conducted user research and usability studies with both government staff and the general public

Worked closely with partners at the City of Oakland to ensure success of their website redesign.

Inkling

Manager, Content Platform and Strategy Mar 2013 - Apr 2014

Managed a team of 4-6 designers and developers

Managed creation of design templates, HTML/SASS frameworks, and scripts that allowed us to scale digital book production process by 100x

Maintained and iterated Inkling Base, a Twitter Bootstrap equivalent for digital books

Led design and development of various interactive javascript pieces for clients

Inkling

Front-end Developer & Designer
Jun 2011 - Feb 2013

Collaborated with publisher clients to design and develop nearly 50 interactive HTML5-based textbooks, cookbooks, and travel books

Researched, designed, and developed internal tools to help scale publishing production

Led initiative to utilize responsive web design in content

Led CSS modernization of entire library for cross-browser and cross-device support

Dual Aesthetic

Freelance Designer & Developer 2005 - June 2011

Clients include YC-backed Like.FM, Rip Van Wafels, Laloo's Goat Milk Ice Cream, and Vital Wines

Crafted thoughtful identities, websites, and user interfaces, and marketing materials

Obtained and managed client relationships

EDUCATION

Brown University

Providence, RI ScB Biology, 2009

RELEVANT COURSES: Object-Oriented Programming, Data Structures and Algorithms, Introduction to Statistics

Rhode Island School of Design

Providence, RI Fall '07 & Fall '08

RELEVANT COURSES: Information Design, Typography

TECHNICAL SKILLS

I prototype with pen and paper, Sketch/Illustrator, and in-browser depending on the need.

I develop using HTML, SASS, and client-side JavaScript in Sublime

I am very familiar with both git and svn version control systems.

Web frameworks I have worked with in the past include Backbone.js, Python/Flask, Node.js, and Meteor.

I love information design and visualization and occasionally dabble in d3.js and Processing.

I occasionally find regular expression and Python scripts useful.
